PHASE NARRATIVE

Rwanda sits in Phase 3B — a strong Political Integration score (76.9) anchors its continental standing, while Economic Sovereignty (57.0) remains constrained by limited export diversification and a narrow domestic revenue base. At 67.0 composite, Rwanda is 13 points from Phase 4 entry. Closing the Economic gap — particularly on Trade Openness and HHI diversification — would convert the Watch gap to Balanced and accelerate Phase 4 eligibility within 2–3 policy cycles.

REGIONAL PEER COMPARISON					
Country	Econ	Pol	Comp	Phase	Gap
Rwanda [*]	57.0	76.9	67.0	Phase 3B	Watch
Kenya	66.6	72.3	69.4	Phase 3C	Balanced
Tanzania	52.1	64.8	58.5	Phase 2	Watch
Uganda	48.3	55.2	51.8	Phase 2	Balanced
Ethiopia	54.3	58.0	56.2	Phase 2	Balanced

- CI DISCLOSURE & DATA NOTES**
- CI-038 VERIFIED — Econ 57.0 / Pol 76.9 canonical split confirmed in Workbook v3.
 - Poverty figure uses 2020 EICV5 survey data (\$2.15/day PPP); next survey expected 2025.
 - PSC 65% correlation disclaimer applies (CI-036); engagement score is index-relative.

- DATA VINTAGE**
- Primary data year: 2022–2023
 - Poverty survey: EICV5 (2020) — within 7-year threshold
 - Missing data: None — Flag 0 (Full Data Confidence)
 - Workbook version: AAI Validation Workbook v3 (April 2026)
 - CI-038 verified canonical split — Econ 57.0 / Pol 76.9

PATHWAY TO PHASE 4 — PRIORITY ACTIONS	
Economic	Boost export diversification; reduce HHI concentration
Economic	Expand trade openness via EAC + AfCFTA corridors
Economic	Domestic revenue mobilization; reduce aid dependency
Political	Maintain PSC engagement and peacekeeping quality
Balance	Close Watch gap (19.9 pts) toward Balanced (<10)

ECONOMIC INDICATORS (8)		
GDP per Capita (PPP)		9.2/10
Trade Openness		8.8/10
Foreign Exchange Reserves		10.0/10
Debt Service Ratio		8.9/10

PSC Engagement Score		10.0/12
Conflict-Affected Status		10.0/10

Political Subtotal	87.1 / 100
--------------------	------------

PHASE NARRATIVE

Botswana ranks among the AAI's phase 4 Continental Leaders in the first iteration, alongside South Africa. It's near-Perfect dimensional balance (2.5 pt gap) reflects decades of prudent fiscal management, sustained AU institutional engagement, and proactive regional integration through SADC and AfCFTA. Both dimensions exceed 80, placing Botswana in a qualitative challenge rather than a structural one: converting resource wealth into a manufacturing base and diversified exports beyond the diamond sector. Sustaining Phase 4 requires active continental leadership, hosting mediation, financing pan-African institutions, and demonstrating the Agenda 2063 model.

REGIONAL PEER COMPARISON

Country	Econ	Pol	Comp Phase	Gap
Botswana [*]	84.6	87.1	85.9 Phase 4	Balanced
South Africa	78.7	87.9	83.3 Phase 4	Balanced
Namibia	60.7	63.8	62.2 Phase 3C	Balanced
Zimbabwe	39.6	45.4	41.2 Phase 2	Balanced
Zambia	46.2	49.9	48.0 Phase 2	Balanced
Angola	49.9	45.6	47.8 Phase 2	Watch

CI DISCLOSURE & DATA NOTES

• CI-025 IMPORTANT DISCLOSURE — Strategic Reserves scored 10/10 (indicator maximum). Raw FX months (18) is the data INPUT, not the indicator score. The indicator caps at 10/10 regardless of raw value. Botswana's reserves exceed the ceiling — this is a structural strength, not a discrepancy. Scores are unchanged. (Workbook v4)

- CI-038: Rwanda canonical split (57.0/76.9) confirmed separately — not applicable here.
- No Flag M (CFA zone) applies. No 1-AES designation. Flag 0 — full data confidence.

DATA VINTAGE

- Primary data year: 2022–2023
- Missing data: None — Flag 0 (Full Data Confidence)
- FX Reserves: Bank of Botswana Annual Report 2023
- Workbook version: AAI Validation Workbook v4 (April 2026)
- CI-025 verified — raw FX months ≠ indicator score

PHASE 4 MAINTENANCE — PRIORITY ACTIONS

Economic	Accelerate export diversification beyond diamond sector
Economic	Grow manufacturing base (MVA currently ~6% GDP)
Economic	Expand AfCFTA trade corridors through SADC
Political	Maintain AU treaty ratification and PSC leadership
Balance	Sustain Balanced gap (<10 pts) through both cycles

ECONOMIC INDICATORS (8)		
GDP per Capita (PPP)		5.2/10
Trade Openness		5.8/10
Foreign Exchange Reserves		5.4/10
Debt Service Ratio		5.6/10
Export Diversification (HHI)		5.1/10
FDI Inflows (% GDP)		6.2/10
Poverty Headcount (\$2.15/day)		5.0/10
Peacekeeping Contribution		6.9/10

Economic Subtotal		55.2 / 100
POLITICAL INDICATORS (7)		
AU Treaty Ratification		9.0/10
Democratic Governance (WGI)		6.2/10
Regional Integration Index		10.2/15
Coup / Governance Stability		9.0/10
Civil Liberties (Freedom Hse)		6.8/10
PSC Engagement Score		7.2/12
Conflict-Affected Status		7.2/10

Political Subtotal		63.6 / 100
--------------------	--	------------

PHASE NARRATIVE

Senegal sits at the upper boundary of Phase 2 (59.4 composite), just 1.6 points from Phase 3 entry. Its political dimension (63.6) already clears the Phase 3 threshold, driven by consistent AU treaty ratification, peacekeeping leadership, and democratic governance. The economic dimension (55.2) is the limiting factor, constrained by poverty headcount, export concentration, and CFA monetary dependency. The oil and gas revenues from the Sangomar field (2024 onward) represent a structural inflection point, managed prudently, they could accelerate Phase 3 entry within the 2030 horizon.

REGIONAL PEER COMPARISON					
Country	Econ	Pol	Comp	Phase	Gap
Senegal [*]	55.2	63.6	59.4	Phase 2	Balanced
Côte d'Ivoire	58.4	61.2	59.8	Phase 2	Balanced
Ghana	54.1	59.3	56.7	Phase 2	Balanced
Mali [1-AES]	28.4	22.6	25.5	Phase 1	Watch
Guinea	41.3	38.8	40.1	Phase 2	Balanced
Mauritania	44.6	47.2	45.9	Phase 2	Balanced

- CI DISCLOSURE & DATA NOTES
- CI-031 IMPORTANT DISCLOSURE — The composite score of 59.4 places Senegal in Phase 2. The figure of 67 cited in the Ch.9 roadmap is the projected 2030 TARGET score, not the current baseline. Trajectory figures are aspirational milestones, not validated scores. Workbook v4 baseline (59.4) is canonical.
 - Flag M — CFA Franc Zone (XOF). No score penalty. Monetary sovereignty constraint noted for transparency. (Workbook v4 Appendix D.)
 - No 1-AES. No Flag 3. Governance continuity confirmed through 2024 presidential transition. Flag 1 (0.97×) applied.

- DATA VINTAGE
- Primary data year: 2022–2023
 - Missing data: Minor gaps — Flag 1 (0.97× applied)
 - Monetary data: BCEAO / West African CFA zone 2023
 - Workbook version: AAI Validation Workbook v4 (April 2026)
 - CI-031 verified — 2030 target ≠ current composite

PATHWAY TO PHASE 3 — PRIORITY ACTIONS	
Economic	Leverage Sangomar oil revenues for economic diversification
Economic	Reduce CFA dependency via ECOWAS single-currency progress
Economic	Lower poverty headcount through Senegal 2035 Vision programs
Political	Sustain democratic governance through election cycles
Balance	Lift Econ dimension to close 8.4 pt gap with Political

ECONOMIC INDICATORS (8)		
GDP per Capita (PPP)		2.0/10
Trade Openness		3.5/10
Foreign Exchange Reserves		3.0/10
Debt Service Ratio		5.5/10
Export Diversification (HHI)		2.5/10
FDI Inflows (% GDP)		5.0/10
Poverty Headcount (\$2.15/day)		2.5/10
Peacekeeping Contribution		4.0/10

Economic Subtotal 35.0 / 100

POLITICAL INDICATORS (7)		
AU Treaty Ratification		5.0/10
Democratic Governance (WGI)		2.5/10
Regional Integration Index		4.0/15
Coup / Governance Stability		0.5/10
Civil Liberties (Freedom Hse)		1.5/10
PSC Engagement Score		1.0/12
Conflict-Affected Status		2.0/10

Political Subtotal 23.6 / 100

PHASE NARRATIVE

Niger presents the AAI's most structurally complex Phase 1 profile: a country navigating three simultaneous constraints. The July 2023 coup triggered AU suspension, institutional rollback, and sharp degradation across Political Integration indicators. AES Bloc membership activates the Sovereignty Paradox flag (0.97x composite), reflecting the tension between declared autonomy goals and the institutional isolation required to achieve them. Flag M (CFA/BCEAO) adds a monetary transparency notation: reserves are pooled under BCEAO rather than held as an independent national buffer. Economically, moderate FDI inflows and manageable debt service are offset by extreme poverty (~52.9%), high export concentration in uranium and petroleum, and limited trade openness as a landlocked state. The 11.4 pt Watch gap signals that political normalization and economic rebuilding must advance together for any Phase 2 transition to hold.

REGIONAL PEER COMPARISON						
Country	Econ	Pol	Comp	Phase	Gap	
Niger [*]	35.0	23.6	28.4	Phase 1	Watch	
Mali [AES]	32.0	18.0	25.0	Phase 1	Watch	
Burkina [AES]	34.0	22.0	27.0	Phase 1	Watch	
Nigeria	52.0	44.0	48.0	Phase 2	Watch	
Senegal	55.0	64.0	59.0	Phase 2	Balanced	
Ghana	58.0	61.0	59.5	Phase 2	Balanced	

- CI DISCLOSURE & DATA NOTES**
- CI-041: Flag 1-AES (0.97x) — Sovereignty Paradox: AES membership signals autonomy intent while deepening institutional isolation.
 - CI-042: Flag M (CFA/BCEAO) — no score penalty; FX reserves reflect pooled BCEAO holdings, not an individual national buffer.
 - CI-043: AU Suspension Aug 22, 2023 reflected in AU Treaty Ratification (5.0/10), PSC Engagement (1.0/12), and WGI scores.
 - CI-044: ECOWAS exit Jan 29, 2025 — Regional Integration (4.0/15) reflects AES membership; AfCFTA retained (AU not expelled).
 - CI-045: Poverty from World Bank 2024 projection (52.9%). FX reserves scored on pooled CFA basis; individual data limited.

- DATA VINTAGE**
- Primary data year: 2023-2024
 - Missing data: Flag 1-AES (0.97x) + Flag M (CFA notation only)
 - FX Reserves: BCEAO / CFA zone pooled — individual data limited
 - Workbook version: AAI Validation Workbook v5 (May 2026)
 - AU Suspension confirmed: Aug 22, 2023 (AU Constitutive Act Art. 30)

PHASE 1 EXIT — PRIORITY ACTIONS	
Economic	Diversify exports beyond uranium and petroleum
Economic	Build revenue capacity outside the CFA monetary framework
Political	Restore constitutional governance; regain AU membership
Political	Re-engage AfCFTA and AU integration programs
Balance	Lift Political Integration floor to close 11.4 pt gap
